

Thermo Roll Tilt & Turn Windows

Dual-Operating Window Features Proprietary Thermo-Roll Features.

Tilt & Turn (and tilt before turn) windows are the pinnacle of fenestration technology for residential, commercial and institutional buildings. Unlike most other styles, Tilt & Turn windows offer dual-action convenience. They tilt-in at the top, and swing-in, along one side. By allowing indirect fresh air while tilting-in, they eliminate drafts and increase comfort, and at the same time reduce safety and security issues associated with other types of open windows. In the swing-in mode, tilt & turn windows create a full opening for easy cleaning or emergency egress. Tilt & turn windows accommodate insect screens easily and provide sweeping unobstructed sightlines.

Features & Benefits

- One handle for all tilting, turning and closing operations.
- 2 7/8 inch sightline on all models.
- Tilt before turn operation offers increased safety.
- All models are compression sealed for maximum efficiency and soundproofing.-
- Dry glazing, with snap-on interior glazing.
- Designed for 1/4 inch glass with 1 I.U. for additional soundproofing.
- Patented Child-Guard* NY City Approved Safety Lock

Thermo Roll's Design Flexibility Engineering Allows for the Windows to be Fabricated with the Mosaic or Universal Frame for Longevity & Lower Costs.
